New fluorescent phenylpyridines were synthesized by the reactions of different aromatic aldehydes with 4-aminoacetophenone, and their fluorescence properties were investigated under the irradiation of a violet laser diode. In this process, the fluorescence quenching of the phenylpyridines was confirmed by fluorescence quenching experiments, and Stern-Volmer constants ($K(SV)$) were calculated. The fluorescence enhancement of phenylpyridines in the presence of different

cations was also studied, and the reasons were discussed. Henri de Bézieux (1534 – 27 August 1584) was a French Renaissance musician and composer, one of the masters of the French chanson.
